

To Whom It May Concern:

We have worked with Jet Electric on numerous commercial projects over the past four years and Jet is one of our preferred electrical contractors. They have never let us down with project schedule requirements and every project has been completed on time.

In all of our projects, they have always been open and honest in their approach to satisfy the needs of the client with respect to cost, schedule, and quality. Their entire team of electricians and apprentices are all friendly and well-mannered making them an easy crew to work with on a job site.

We look forward to many more years of working with Jet Electric and highly recommend them to anyone else looking for a trusted and proven electrical contractor.
